Summary

Full Stack Developer and Software Engineer with hands-on experience in back end development, web application development, and cloud-based DevOps. Proficient in building end-to-end web applications using React.js, TypeScript, Node.js, Flask, and FastAPI, with strong back end expertise in Python and JavaScript. Experienced in designing and consuming REST APIs, JWT authentication, and database management with MySQL and MongoDB. Skilled in web design using front end technologies including React.js, TypeScript, Vite, and Tailwind CSS. Hands-on with cloud platforms including AWS, Google Cloud (GCP), and DigitalOcean, along with containerization and CI/CD pipelines. Passionate about solving real-world problems through scalable software engineering, and currently serving as **Vice President of the Student Representative Council (SRC)**, leading student initiatives and events across campus.

Education

Symbiosis Institute of Technology, Nagpur — Nagpur, Maharashtra
Bachelor of Technology in Computer Science Engineering; CGPA: 7.4/10.0 — *Aug 2024 – May 2028*

- Relevant Coursework: Data Structures & Algorithms, Operating Systems, Design & Analysis of Algorithms, Object-Oriented Programming (Java & Python), Database Management Systems, Computer Networks

Experience

Web Developer Intern — Nov 2025 – Dec 2025
Elevate Labs — *Remote*

- Built **Smart Resume Builder**, a full-stack **Next.js** application with multi-step resume editor, live preview, one-click PDF export, and **Google Gemini AI** suggestions for ATS-optimized content
- Developed **Zen Chat**, a real-time messaging web application using React, TypeScript, and **Socket.IO** with private/group chats, presence indicators, optimistic updates, and fully responsive mobile layout

DevOps Intern — Jun 2025 – Jul 2025
Elevate Labs — *Remote*

- Automated multi-cloud deployments on **GCP and DigitalOcean** using Terraform and shell scripts, set up **Jenkins CI/CD pipelines** for containerized apps, reducing deployment time by 40%
- Built a **Dockerized Flask app** with RBAC, REST APIs, and automated email alerts; created scalable IaC templates cutting incident resolution time by 30%

Projects

CustomerPulse | *Python, FastAPI, PostgreSQL, pgvector, AWS Bedrock, Amazon S3, WebSockets, Docker* — 2026

- Built an **AI-powered customer complaint intelligence backend** using **FastAPI** and **Amazon RDS PostgreSQL**, ingesting CFPB complaint datasets from private **Amazon S3** with filterable preview/import and upsert-based persistence
- Engineered a hybrid enrichment pipeline combining local sentiment, category, and urgency signals with **AWS Bedrock** to generate churn risk, draft responses, and next actions, with validation, retries, and WebSocket processing updates
- Implemented a **RAG pipeline** using **pgvector** cosine similarity to retrieve similar past complaints and ground **Bedrock**-generated draft responses, with anti-hallucination guardrails and human-in-the-loop review

TenderBlock | *React, Node.js, Express, MySQL, Flow Blockchain, FCL, IPFS, JWT* — 2026

- Built a **Web3 decentralized tendering platform** on Flow blockchain where tender creation, bidding, and settlement execute on-chain and get indexed into MySQL for fast reads and search
- Implemented dual-auth (wallet via FCL and JWT cookie), **IPFS** document storage, rate limiting, and paginated tender discovery API with status filters and text search

MemoryLens | *React, FastAPI, FAISS, AWS Rekognition, Bedrock, Textract, Python* — 2026

- Developed and deployed to production an **AI-powered multimodal search assistant** – semantic document retrieval using FAISS + AWS Titan embeddings and face-based photo search via AWS Rekognition
- Engineered multi-format indexing pipeline (PDF, DOCX, PPTX, XLSX, images) with **background processing**, real-time progress tracking, and unified React UI with ranked results and direct file access

Technical Skills

Languages: Python, Java, C, SQL, JavaScript, HTML/CSS, Bash/Shell Scripting
Frontend: React.js, Vite, React Router, Tailwind CSS, Streamlit, TypeScript
Backend: Node.js, Flask, FastAPI, Express.js, REST APIs, JWT Authentication
DevOps & Cloud: Docker, Terraform, Jenkins, Git, GitHub Actions, CI/CD, AWS, GCP, Digital Ocean
Databases: MySQL, PostgreSQL, MongoDB, Oracle
Tools & Technologies: Linux, Agile/Scrum, Jira, Postman, Web3, IPFS
Core Competencies: Data Structures & Algorithms, System Design, Web Application Security, Computer Networks

Certifications

DevOps Internship Certificate – Elevate Labs
Red Hat Certified Specialist in Python Programming (AD141 – RHA)
Data Structures and Algorithms using Python
Cisco Networking Basics
HackerRank SQL (Intermediate)

Volunteering & Leadership

Vice President, Student Representative Council (SRC) – Symbiosis Institute of Technology
Organizer – SITNovate 1.0 (24-hr Hackathon) | Enthusia 4.0, Symbiosis Institute of Technology
Organizer & Sponsorship – Enthusia 5.0 (College Cultural & Technical Fest), Symbiosis Institute of Technology
Campus Ambassador – Unstop (Present) | Promoting hackathons and tech competitions across campus
Lead, Hacker's Experience Team & Web Developer – Hack4Brahma & Hack4Maha Hackathons
